Portfolio / GitHub / LinkedIn

Profile

Frontend software engineer combining Next.js, React and Angular with UI/UX design to create clear, responsive interfaces. Experience spans business systems, healthcare, ecommerce and public websites through Baruchsoft Technologies and independent work.

Technical skills

Development: Next.js, React, Angular, JavaScript, HTML, CSS, Tailwind CSS, Bootstrap

Interface design: UI/UX, responsive layouts, reusable components, prototyping

Integration and workflow: REST APIs, state management, client-side routing, Git, GitHub

Professional experience

Baruchsoft Technologies
Frontend Software Engineer and Digital Marketer

- Develop frontend interfaces and contribute UI/UX design for client systems across commerce, people management, payments, finance and hospitality.
- Translate business requirements into responsive screens and reusable components, using Next.js, React and Angular across the project portfolio.
- Connect frontend interfaces to backend APIs, including state management and client-side routing.

Independent freelance work
Frontend and Website Development

- Deliver independent frontend, website and interface design work, including projects through Freelancer.com.

Selected frontend projects

Frontend development and UI/UX across the following systems and websites.

B-Officio: Production leave management system, with broader employee management on its roadmap.

B-Commerce: Ecommerce storefront for online shopping.

Neosave Sentinel: Mobile command interface for monitoring neonatal health risks.

TheHub RMS: Hotel and restaurant management with food ordering and delivery.

Selected websites: Community CBE Campaign and INNOECOFOOD, alongside community, research and business websites.

Education and development

Bachelor's degree in Software Engineering, Kisii University

Additional training: Java Programming and Software Engineering Fundamentals, Duke University via Coursera; Web Development Bootcamp, PowerLearn Project and Safaricom Hook.

Languages: English and Kiswahili
