 [linkedin.com/in/joshua-ogallo-9a2628251](https://www.linkedin.com/in/joshua-ogallo-9a2628251)

Skills

Java

Python

Spring Boot Framework

Mobile App

SQL & DBMS

UI/UX Design

JavaScript

Web development

Profile

Frontend Software Engineer specializing in building sleek, modern, and highly responsive user interfaces. Expert in React, Next.js, and advanced UI/UX design principles, with a strong foundation in system architecture. Proven ability to bridge the gap between high-end design aesthetics and complex backend APIs, delivering seamless, user-centric web applications for retail, healthcare, and e-commerce sectors.

Education

Secondary

Jan 2018 – Apr 2022

Migori School, Migori

Completed secondary education with a focus on academic excellence, leadership, and extracurricular activities, developing critical thinking, discipline, and teamwork skills.

Tertiary

Sep 2022 – May 2026

Kisii University, Kisii

Pursued a Bachelor's degree in Software Engineering, focusing on programming, system design, and software development methodologies. Actively engaged in coding projects, research, and collaborative learning to build innovative solutions and advance technical expertise.

Technical Skills

- ✦ **Frontend Development:** Next.js, React, JavaScript (ES6+), HTML5, CSS3, Tailwind/Bootstrap
- ✦ **UI/UX & Design:** Minimalist & modern interface design, responsive web design, AI-assisted UI prototyping
- ✦ **API & Client-Side Architecture:** RESTful API integration, state management, client-side routing
- ✦ **Backend & Tooling (Contextual):** Java, PostgreSQL, Git/GitHub, WebStorm

Core Technical Competencies

Component Architecture & UI/UX: Expert in designing reusable, modular UI components. Proficient in translating minimalist, modern design mockups into pixel-perfect, accessible, and highly interactive web interfaces.

Frontend Performance Optimization: Applies deep knowledge of data structures and algorithms to optimize DOM rendering, manage complex client-side state, minimize layout shifts, and ensure rapid application load times.

Data Integration & API Consumption: Highly skilled in asynchronous JavaScript, efficiently managing client-side data fetching, caching, and state synchronization with RESTful backend services.

Professional Experience

Junior Frontend Developer | **Baruchsoft Technologies**

- ✦ Drive the UI/UX direction and frontend architecture for custom client applications, ensuring premium, user-centric designs.
- ✦ Translate complex business requirements into intuitive, modern web interfaces, utilizing rapid prototyping and AI-accelerated workflows to decrease time-to-market.
- ✦ Collaborate closely with backend systems to ensure seamless data integration and optimal client-side performance.

Languages

- English
- Kiswahili

Hobbies

- Coding and exploring new technologies
- Writing poetry and creative expression
- Practicing calisthenics and fitness
- Designing and experimenting with UI/UX concepts
- Reading and learning about emerging trends in software engineering

Qualities

- Problem Solver
- Resilient
- Proactive and Self motivated
- Adaptable
- Creative Thinker
- Time Management Skills
- Leadership
- Collaborative Team player

Achievements

E-Commerce Platform Interface - Engineered a highly responsive frontend architecture using modern JavaScript, HTML5, and advanced CSS, ensuring a flawless user experience across a wide matrix of desktop and mobile devices.

Designed intuitive product discovery interfaces and integrated seamless, highly secure payment UI components, drastically reducing friction in the user checkout flow.

AI Telemedicine Application UI - Spearheaded the frontend development for an AI-integrated telemedicine platform, prioritizing a clean, minimalist aesthetic to reduce cognitive load for patients and medical staff.

Integrated WebRTC protocols to build a low-latency, real-time video consultation interface directly within the browser, handling dynamic media streams and connection states.

Health Management Dashboard - Constructed a comprehensive administrative frontend using modern templating and CSS frameworks to clearly visualize complex, relational patient data and medical records.

Real-Time Chat Interface - Designed and built a highly responsive, real-time messaging user interface, shifting the focus from backend socket handling to fluid UI updates.

Implemented features for immediate visual feedback upon message delivery, dynamic thread management, and smooth scrolling mechanisms for large volumes of asynchronous text data.

Certifications

❑ Java Programming and Software Engineering Fundamentals

Institution: [Coursera](#) (offered by [Duke University](#))

Key Skills: Object-Oriented Programming, Debugging, Software Development Lifecycle, Data Structures.

❑ Database Design and Implementation

Institution: [Udemy](#)

Key Skills: Database Schema Design, SQL Query Optimization, Data Normalization, and Transactions Management.

❑ Web Development Bootcamp

Institution: [PowerLearn Project \(Safaricom Hook\)](#)

Key Skills: HTML, CSS, JavaScript, Responsive Design, Backend Integration.

❑ Leadership and Personal Development

Institution: [ALX](#)

Key Skills: Effective Communication, Team Collaboration, Problem Solving, Goal-Oriented Leadership.

❑ Cybersecurity Basics

Institution: [Cisco Networking Academy](#)

Key Skills: Network Security, Data Encryption, Threat Detection, and Risk Management.
